

Cygnat Texkimp's Blade and Roll Over roll coating technologies offer a relatively low-cost way of applying high-viscosity coatings with medium to high coat weights, typically 30gsm and above.

These machines can be used to coat a large range of substrates and are commonly used to process uneven surfaces including textiles and woven fabrics.

Email: info@cygnet-texkimp.com

Web: www.cygnet-texkimp.com

Typical specification:

- Up to 1800mm web width
- Typical substrates – Paper and Fabric
- Medium to high viscosity resins
- Heated – dependent on resin
- Precision ground coating roller
- Hardened and ground blade/top roller
- Multi axis positioning of top blade
- Precision coating gap adjustment
- Multiple blade profiles available
